Professional Profile

Results-driven Computer Science graduate with **4+ years** of professional experience in software development, data analysis, and technology education. Combines strong technical skills in full-stack development, data systems, and business intelligence with proven experience in business analysis, and requirements engineering.

Education

Bachelor of Science in Computer Science

2019 – 2024

University of Nairobi

- **Relevant Coursework:** Software Engineering, Data Structures, Algorithm Design, Business Intelligence & Analytics, Machine Learning, Cloud Computing, Network Security

Technical Competencies

Software Development & Analysis

- **Languages:** Python, JavaScript (ES6+), Java, C/C++, Solidity, SQL, HTML5, CSS3
- **Frameworks/Libraries:** React, Next.js, Node.js, Express, Tailwind CSS, Scikit-learn, TensorFlow, Pandas, NumPy
- **Technology Stacks:** MERN (MongoDB, Express, React, Node.js)

Mobile Data Collection & Survey Tools

- **Expert:** Kobo Toolbox (KoboCollect), ODK (Open Data Kit)
- **Proficient:** Google Forms, SurveyMonkey

Data Analysis & Visualization

- **Tools:** Power BI, Tableau, Excel (Advanced), Pandas, NumPy, Matplotlib, Seaborn
- **Skills:** Data Cleaning, Statistical Analysis, Dashboard Design, Report Generation

Database Systems

- **SQL:** MySQL, PostgreSQL
- **NoSQL:** MongoDB
- Database Design, Administration, and Optimization

Cloud, Networking & DevOps

- AWS, Computer Networks, Distributed Systems, System Administration

Blockchain Development

- Smart Contracts (Solidity), Hardhat, Ethers.js, Algorand, Web3

Professional Experience

School Web Developer & Technology Educator

2024 – Present

Amonto Girls Academy Secondary School — Juba, South Sudan

- **Primary Web Developer:** Design, develop, and maintain the school's official website, implementing features such as program information portals, student resources, news updates, and contact forms.
- **System Maintenance & Updates:** Ensure website security, performance optimization, and regular content updates while managing hosting and deployment processes.
- **Technology Curriculum Delivery:** Teach computer science fundamentals including web development, programming concepts, and data analysis to high school students.
- **Technical Project Leadership:** Mentor students through software development projects, providing guidance on modern development practices and tools.

Data Systems Assistant

2021 – 2022

World Vision Uganda — Adjumani, Uganda

- **Mobile Data Collection Specialist:** Served as primary data collector and administrator for refugee assessment projects using **Kobo Collect/ODK**, collecting and processing **over 10,000 data points** with high accuracy.
- **System Implementation & Training:** Implemented mobile data collection tools and provided comprehensive end-user training to field staff.
- **Data Analysis & Reporting:** Generated analytical reports and interactive dashboards using **Power BI, Excel, and SQL** for program monitoring and strategic decision-making.

Data Entry Intern

Jul – Sep 2023

Office of the Prime Minister (Uganda) — Refugee Registration Desk

- **Database Management:** Managed and maintained refugee registration database systems, processing and verifying **500+ refugee records**.
- **Reporting:** Assisted in generating accurate reports for government agencies using database queries and spreadsheet software.

Relevant Projects

Decentralized Voting System

Python, Solidity, React, Node.js

- Led the full-stack development of a blockchain-based voting platform, from requirements analysis and smart contract design to front-end implementation.
- Ensured system transparency and immutability, demonstrating strong skills in both traditional and emerging technology stacks.

Lost & Found Platform for South Sudan

Next.js, React, MongoDB, Node.js

- Designed and developed a community-driven web application, focusing on user experience, secure data handling, and efficient database design.

South Sudan National Exams Hub

Next.js 16, React 19, TypeScript, MongoDB

- Built a modern, scalable web platform with admin dashboards and resource management, showcasing skills in building maintainable software systems.

Certifications & Professional Development

- **Introduction to DHIS2** — Health Information Management System 2025
- **Algorand Blockchain Developer** — Technical Development Certificate 2024

Core Skills

- Software Development Lifecycle (SDLC)
- Business & Requirements Analysis
- Agile Methodologies
- Cross-platform Development
- Usability & UX Design Principles
- Data Analysis & Visualization
- Technical Documentation
- Problem-Solving & Critical Thinking
- Team Collaboration & Mentoring
- Client & End-User Training

Languages

English — Fluent
Dinka — Native

Kiswahili — Proficient
Nuer — Proficient

Arabic — Conversational
